## KNX LAUNCHES A NEW PLATFORM FOR SMART HOME AND BUILDING PROJECTS!

**More than 500 KNX projects have already been published: The KNX Project Platform brings interested parties and system integrators together**

**BRUSSELS, 25 JULY 2018** - *With the new platform for smart home and building projects, the KNX Association is creating a new central contact point for revolutionary and innovative KNX installations from all over the world at <https://projects.knx.org>. As of now, system integrators, developers and architects will be able to present their KNX projects in a visually appealing manner to the general public on a global scale with just a few clicks. Over 500 projects have already been published since the launch.*

### The full variety of the KNX world on a single platform

The multifaceted projects on the new KNX Project Platform demonstrate what is already technically possible thanks to KNX's leading global solutions for smart homes and buildings. "The KNX-based smart home solutions enable the living of tomorrow to be realised today. In addition, the KNX projects demonstrate how increasingly complex trades can be automated in public and commercial buildings with impressive results," Franz Kammerl, President of the KNX Association, is enthusiastic about the wide range of different KNX projects from all over the world.

### Exciting impressions

The new KNX Project Platform is available in a total of 6 languages and addresses KNX projects of all types and sizes. Using a search function, interested parties can quickly find suitable projects and obtain an overview of the most important facts for any given project. Project images also provide exciting impressions. It is also easy to contact the respective project manager. "This is yet another added value of our new platform. It brings interested parties and system integrators together and thus ultimately results in new KNX projects", KNX President Franz Kammerl explains.

### New features now available

A further expansion of the already extensive functionality of the KNX Project Platform is now implemented. Project managers are able to upload full documentation of their KNX projects, to publish videos on their projects and to give interested parties an even better understanding of these projects. Besides, there will be a set of features for system integrators such as they will be able to upload their KNX Project file, so that they can consult it from their MyKNX account (not public for the viewers but only for the responsible of the project)

The screenshot shows the 'KNX Projects' website interface. At the top right, there is a language selector set to 'EN'. Below the logo, there is a 'Submit your own project' button. The main content area features a filter bar with 'Project category' (Residential, Commercial, Other), 'Country' (All), and 'Sort by' (Random). Below the filters is a grid of six project photos, each with a caption and location information:

- Lighting Showroom "Marriott Los Arcos Plaza"**: Samborondón - Ecuador. Commercial project in Samborondón, Ecuador.
- British American Tobacco Turkey Head Office**: Istanbul - Turkey. Commercial project in Istanbul, Turkey.
- Monash Children's Hospital**: Clayton South Victoria - Australia. Commercial project in Clayton South Victoria, Australia.
- IREKS-AROMA**: Jastrebarsko - Croatia. Commercial project in Jastrebarsko, Croatia.
- 50 Hertz Berlin**: Berlin - Germany. Commercial project in Berlin, Germany.
- Mercedes Benz Unley**: Adelaide - Australia. Commercial project in Adelaide, Australia.

**About KNX**

*KNX Association is the creator and owner of the KNX technology - the worldwide STANDARD for all applications in home and building control, ranging from lighting and blind control to various security systems, heating, ventilation, air conditioning, monitoring, alarming, water control, energy management, smart metering as well as household appliances, audio/video and many more. KNX provides a single, manufacturer independent design and commissioning tool (ETS), with a complete set of supported communication media (TP, PL, RF and IP) as well as a complete set of supported configuration modes (system and easy mode). KNX is approved as a European (CENELEC EN 50090 and CEN EN 13321-1) and an International standard (ISO/IEC 14543-3). This standard is based upon 28 years of experience in the market. Over 400 member companies worldwide from different application domains have more than 7000 KNX certified product groups in their catalogues. The KNX Association has partnership agreements with nearly 75,000 installation companies in 164 countries.*
