

KNX Association cvba is the creator and owner of the KNX technology – the worldwide STANDARD for all applications in Home and Building Control, ranging from lighting, shutter control to various security systems, heating, ventilation, air conditioning, monitoring, alarming, water control, energy management, metering as well as household appliances, audio and lots more.

KNX is the only standard for home and building control with one single manufacturer independent design and commissioning tool, with a complete set of supported communication media (TP, PL, RF and IP) as well as a complete set of supported configuration modes (system and easy mode).

KNX is approved as a European and an International standard (ISO/IEC 14543-3).

KNX offers service oriented third parties a manufacturer independent standardized IoT interface and is designing a KNX extension to use using IPv6 networks for KNX data exchange.

KNX currently wishes to extend its Team with a

KNX ETS (Engineering Tool Software) Product Manager

General skills

- Has good oral communication, presentation, negotiating and documentation skills
- Is able to manage projects autonomously, yet as an active team player
- An eye for detail, able to multitask and work well under pressure
- Natural tendency to be curious, positive and creative
- Sincere empathy for the customer and a commitment to delve deep into the challenges they present or experience

Educational skills

- Bachelor's Degree in Business or related field such as economics, communication, advertising, marketing or statistics respectively Bachelor's Degree in Engineering or Technology
- Affinity for software and Information Technology
- Expertise in home/building automation, KNX and ETS
- Expertise in other home and building automation systems is an asset

Language skills

- English good oral skills, write fluently
- German good oral skills, write fluently
- Any other language an asset

Tasks

- Permanent market research (through interaction with KNX members/future and potential ETS licensees – via participation to conferences/fairs and visits) to reap ideas for functionality that is missing in the ETS and would be beneficial for the success of KNX in the market
- Benchmarking the KNX ETS with competitors' products/software and drawing conclusions from this
- Specifying and overseeing the research needed to determine the needs and desires of ETS licensees
- Helping to oversee the design and planning how to market and promote the ETS to the public
- Reporting via the KNX Management to the KNX Executive Board
