

Press release

KNX AWARD 2014

KNX Association International is pleased to announce that applications can now be handed in for the KNX Award 2014, which will be granted at the light+building fair 2014 (on the 1st of April) in Frankfurt (Germany). The KNX Award rewards the smartest KNX projects in home and building control around the world, which stand out as regards innovation and technical progress. Applications are welcome from around the world in 5 categories: International, Publicity, Energy Efficiency, Young, Special. Deadline for submission: 6 December 2013. More info at www.knx.org/knxaward

The KNX Award 2014 picks up on the basic principle of the craft industry. Determining factors for KNX Association to increase the chances of one's application are not size and volume of the KNX installation, but rather

- The diversity of the included trades
- The flexibility and expandability
- The level of automatization and complexity of the installation
- The user friendliness and user acceptance
- The convincing arguments for the client
- The implementation of products from different manufacturers

Prizes and Jury

The prize money in each category of the KNX Award amounts to €1000. Winners in each category will also receive the coveted KNX trophy. The jury consists of neutral experts from the KNX world and KNX Association. If necessary, KNX Association and the jury may request additional information from the participants to evaluate the projects. The awards will be granted in 5 categories: International, Publicity, Energy Efficiency, Young, and Special.

Timeline

- The deadline to submit a complete set of application documents is 6 December 2013.
- The jury will evaluate the submitted material in January 2014.
- The five top nominees in each category will be informed by email after the end of the jury's meeting.
- The KNX Awards 2014 are granted at the light+building fair in Frankfurt (on the 1st of April 2014).

KNX Association is the creator and owner of the **KNX** technology – the worldwide STANDARD for all applications in home and building control, ranging from lighting and shutter control to various security systems, heating, ventilation, air conditioning, monitoring, alarming, water control, energy management, smart metering as well as household appliances, audio/video and lots more. **KNX** is the worldwide standard for home and building control with a single, manufacturer independent design and commissioning tool (ETS), with a complete set of supported communication media (TP, PL, RF and IP) as well as a complete set of supported configuration modes (system and easy mode). **KNX** is approved as a European (CENELEC EN 50090 and CEN EN 13321-1) and an International standard (ISO/IEC 14543-3). This standard is based upon more than 23 years of experience in the market including its predecessors, EIB, EHS and BatiBUS. Over 300 member companies worldwide from different application domains have almost 7000 **KNX** certified product groups in their catalogues. The **KNX** Association has partnership agreements with more than 37,000 installer companies in more than 120 countries.
