KNX welcomes LG Electronics as member 350!

BRUSSELS, 20 October, 2014: The spreading of the KNX system, the worldwide standard for home and building control, enshrined in the ISO/IEC 14543-3 series, confirms again the internationalisation of this leading technology. The community around KNX, which is known for its high degree of interoperability between products of different manufacturers and different application domains, was recently proud to welcome the 350th manufacturer joining its ranks, LG Electronics from Korea.

LG Electronics is a global leader and technology innovator in consumer electronics, mobile communications and home appliances, employing 87,000 people working in 113 locations around the world. With 2013 global sales of USD 53.10 billion, LG comprises five business units - Home Entertainment, Mobile Communications, Home Appliance, Air Conditioning & Energy Solution and Vehicle Components. Furthermore LG is one of the world's leading producers of flat panel TVs, mobile devices, air conditioners, washing machines and refrigerators.

As a new member of the KNX Association, the interest of LG Electronics lies in enriching the KNX product portfolio, which will undoubtedly greatly benefit the further application of the KNX in the area of building control on a domestic Korean, but also on an international level.

Mr. Franz Josef Kammerl, President of KNX Association commented: 'LG Electronics is the fifth Korean company to join the KNX Association. But LG Electronics does not only stand for high product quality for any kind of electronics, the involvement in KNX opens a new world for further cooperation on an international scale. Therefore, we are proud about the joining of LG Electronics and calling one of the biggest manufacturers worldwide a part of the continuously growing KNX community.'

About KNX

KNX Association is the creator and owner of the KNX technology – the worldwide STANDARD for all applications in home and building control, ranging from lighting and shutter control to various security systems, heating, ventilation, air conditioning, monitoring, alarming, water control, energy management, smart metering as well as household appliances, audio/video and lots more. KNX is the worldwide standard for home and building control with a single, manufacturer independent design and commissioning tool (ETS), with a complete set of supported communication media (TP, PL, RF and IP) as well as a complete set of supported configuration modes (system and easy mode). KNX is approved as a European (CENELEC EN 50090 and CEN EN 13321-1) and an International standard (ISO/IEC 14543-3). This standard is based upon more than 24 years of experience in the market. More than 370 member companies worldwide from different application domains have almost 7000 KNX certified product groups in their catalogues. The KNX Association has partnership agreements with more than 40,000 installer companies in more than 125 countries.
