Information

Smart homes and buildings are shaping cities and the world. Especially in times, in which the Internet of Things finds its way to every aspect of our lives, it is of most importance to address the topics of home and building automation as part of the Internet of Things, as well as necessary security aspects.

With more than 26 years of experience, the leading KNX Standard (ISO/IEC 14543-3) already offers revolutionary solutions. Therefore, KNX South East Asia and KNX Association are proud to invite to learn more about the future of home and building automation at:

KNX Roadshow South East Asia

- Introduction to KNX IoT and KNX Secure -

The KNX Roadshow is the perfect opportunity for all to participate at KNX events without long travels. Therefore, we would like to invite you to the following events:

The Green Networking Forum for KNX Technology and Application

This KNX Networking Forum offers everyone to learn about the advantages and novelties of the worldwide leading technology for home and building control, whilst networking with the KNX community. This event is followed by a

KNX Training Workshop

Learn how KNX is put into practise: Learn more about the KNX system during a theoretical and practical training session with the unique manufacturer independent tool, the “ETS5”.

How to participate

Participation at the Forum and the Technical Workshop is **Free of Charge**. Please take into consideration that places are limited. For planning reasons please register for the specific event by clicking on the respective link. Also, please mind the deadlines for each event.
